RESEARCH INTERESTS

Benjamin Kuipers investigates the representation of commonsense and expert knowledge, with particular emphasis on the effective use of incomplete knowledge. He received the B.A. in Mathematics from Swarthmore College, and the Ph.D. in Mathematics from MIT. He has held faculty appointments at Tufts University, the University of Texas at Austin, and the University of Michigan. His research accomplishments include developing the TOUR model of spatial knowledge in the cognitive map, the QSIM algorithm for qualitative simulation, the Algernon system for knowledge representation, and the Spatial Semantic Hierarchy model of knowledge for robot exploration and mapping.
