

Adventures in Computing with The UGA Computer Science Dept.

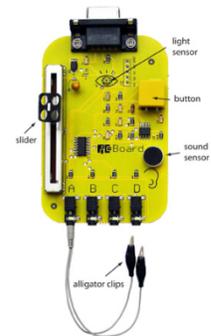

Pico Crickets + Scratch

Discover the **Pico Cricket** (a tiny computer that can make things spin, light up, and play music). Use it to create arts and crafts for the digital age! - a musical pickle, a birthday cake that sings when you blow out the candles, a cat that purrs when you pet it!

Use the **Scratch** program to make your own 2D animations and games. Then use the PicoBoard's light and sound sensors to control your on-screen Scratch creations!

Level: Middle School (ages 11-15)

Date: Mon-Fri, July 13th - 17th

Time: 8:30 am - 3:30 pm

Cost: \$199 (scholarships available)

Limited to 20 participants

See: www.cs.uga.edu/SummerCamp for applications and scholarship info, beginning in early March.
