UML DIAGRAM

For the following boxes, please draw the indicted relationships (1-3). Remember to include cardinality, reference variables and arrows.

1. A Manager knows how to delegate responsibilities to his many Employees. Employees know how to do the work assigned to them. Both Managers and Employees have names. Managers know who their Employees are and Employees know their Manager.

2. An Airport has many Airplanes. Airports have a name and location and know how to delay Airplanes. Airplanes have an airline and know how to take off and land. Airports know their Airplanes and Airplanes know their Airport.

3. A NinjaTurtle is a SuperHero. Michelangelo is a NinjaTurtle. A SuperHero knows how to fight crime. A NinjaTurtle knows how to eat pizza and knows its weapon. Only Michelangelo knows how to get pizza.
