

# Pixel Spreadsheet

Version: 1.0

Status: Functional

## Installation Instructions:

Run the executable from any desired location. The program will automatically extract and create the required DLLs in the same location.

## Known Bugs:

Symbols (such as punctuation and non-Latin characters) in a spreadsheet may cause program to crash.

## Additional Notes:

Some antivirus programs might identify the executable as a virus when attempting to install. It may be necessary to add an exception or disable virus detection during installation.
