Research Interests

I build systems techniques to enable efficient data center processing. Efficient data center processing is challenging due to rapid growth in data and software complexity along with the ongoing slowdown in hardware performance scaling. As a consequence, micro-architectural structures (*e.g.*, instruction and data cache, branch predictors) can no longer meet the demand of data center applications. Combining insights from computer architecture, compilers, and operating systems, I design techniques to enable near-ideal micro-architectural structures via profile-guided optimizations. Consequently, Intel and ARM have adopted a couple of my techniques. My work has appeared in top computer architecture and systems venues like ISCA, MICRO, OSDI, PLDI, FAST, and EuroSys. My research has also received MICRO 2022 Best Paper Award, DATE 2023 Best Paper Award Nomination, IEEE Micro Top Picks 2023 distinction, and multiple prestigious Fellowships.

Education

2017-present **Ph.D.**, *University of Michigan*, Ann Arbor, Michigan, USA
- Computer Science and Engineering
- Thesis: Rescuing Data Center Processors
- Advisor: Prof. Baris Kasikci

2017 **M.Sc.**, *Bangladesh University of Engineering and Technology*, Dhaka, Bangladesh
- Computer Science and Engineering

2014 **B.Sc.**, *Bangladesh University of Engineering and Technology*, Dhaka, Bangladesh
- Computer Science and Engineering
- Class Rank: 1/153

Awards and Honors

2023 IEEE Micro Top Pick (awarded to the top 12 computer architecture papers of 2022)
2023 DATE Best Paper Award Nomination
2022-2023 Rackham Predoctoral Fellowship ($100,000 towards tuition, stipend, and insurance), University of Michigan
2022 MICRO Best Paper Award (top two of 83 papers, top 1% of 348 submissions)
2022 Qualcomm Innovation Fellowship Finalist (one of 46 finalists)
2021 Graduate Student Honors (Best PhD Research Award in the Michigan Systems Lab), University of Michigan
2020 Facebook Fellowship Finalist (top 4% of 1800 applicants)
2017-2018 Rollin M. Gerstacker Foundation Fellowship ($100,000 towards tuition, stipend, and insurance)
2014 Crest of Honor, Highest CGPA in the department, presented by BUET alumni association
2009-2014 University Merit Scholarship, Bangladesh University of Engineering and Technology
2009-2014 Dean's List Scholarship, Bangladesh University of Engineering and Technology

Mentee Awards and Honors

2022 First place in ACM undergraduate student research competition (MICRO'22), Kan Zhu
2021 CRA outstanding undergraduate researcher award honorable mention, Shixin Song
2021 First place in ACM undergraduate student research competition (MICRO'21), Shixin Song

2020 First place in ACM undergraduate student research competition (CGO'20), Nathan Brown

Peer-Reviewed Conference Publications

Underlined authors are undergraduate[U] and graduate[G] students mentored by me.

DATE'23 Yuhan Chen[G], Alireza Khadem, Xin He, Nishil Talati, **Tanvir Ahmed Khan**, and Trevor Mudge
PEDAL: A Power Efficient GCN Accelerator with Multiple DAtafLows.
In proceedings of the 26th Design, Automation, and Test in Europe (**DATE**) conference, 2023.
Best Paper Award Nomination
An accelerator for graph convolutional neural networks that automatically selects optimized dataflow and phase ordering

MICRO'22 **Tanvir Ahmed Khan**, Muhammed Ugur[U], Krishnendra Nathella, Dam Sunwoo, Heiner Litz, Daniel A. Jiménez, and Baris Kasikci
Whisper: Profile-Guided Branch Misprediction Elimination for Data Center Applications.
In proceedings of the 55th IEEE/ACM International Symposium on Microarchitecture (**MICRO**), IEEE, 2022.
Best Paper Award
First branch prediction technique that identifies precise program contexts leading to branch mispredictions and encodes corresponding hard-to-predict correlations in branch history efficiently using Boolean formulas

MICRO'22 Yuxuan Zhang[G], **Tanvir Ahmed Khan**, Gilles Pokam, Baris Kasikci, Heiner Litz, and Joseph Devietti
OCOLOS: Online COde Layout OptimizationS.
In proceedings of the 55th IEEE/ACM International Symposium on Microarchitecture (**MICRO**), IEEE, 2022.
IEEE Micro Top Pick
First online system that enables profile-guided optimizations of unmanaged applications on a running process

ISCA'22 Shixin Song[U], **Tanvir Ahmed Khan**, Sara Mahdizadeh Shahri[G], Akshitha Sriraman, Niranjan K Soundararajan, Sreenivas Subramoney, Daniel A. Jiménez, Heiner Litz, and Baris Kasikci
Thermometer: Profile-Guided BTB Replacement for Data Center Applications.
In proceedings of the 49th International Symposium on Computer Architecture (**ISCA**), ACM, 2022.
First replacement technique that realizes applications' holistic behavior to avoid branch target mispredictions

EuroSys'22 Saba Jamilan[G], **Tanvir Ahmed Khan**, Grant Ayers, Baris Kasikci, and Heiner Litz
APT-GET: Profile-Guided Timely Software Prefetching.
In proceedings of the 17th European Conference on Computer Systems (**EuroSys**), ACM, 2022.
First data prefetching technique that ensures prefetch timeliness using Intel LBR's cycle information

MICRO'21 **Tanvir Ahmed Khan**, Nathan Brown[U], Akshitha Sriraman, Niranjan Soundararajan, Rakesh Kumar, Joseph Devietti, Sreenivas Subramoney, Gilles Pokam, Heiner Litz, and Baris Kasikci
Twig: Profile-Guided BTB Prefetching for Data Center Applications.
In proceedings of the 54th IEEE/ACM International Symposium on Microarchitecture (**MICRO**), IEEE, 2021.
Semiconductor Research Corporation (SRC) Best Paper, Q3'2021
First prefetching technique that enables near-ideal branch predecoding to avoid branch target mispredictions

MICRO'21 Niranjan Soundararajan, Peter Braun[G], **Tanvir Ahmed Khan**, Baris Kasikci, Heiner Litz, and Sreenivas Subramoney
PDede: Partitioned, Deduplicated, Delta Branch Target Buffer.
In proceedings of the 54th IEEE/ACM International Symposium on Microarchitecture (**MICRO**), IEEE, 2021.
First architectural design that stores branch targets efficiently by removing redundancies among branches

OSDI'21 **Tanvir Ahmed Khan**, Ian Neal, Gilles Pokam, Barzan Mozafari, and Baris Kasikci
DMon: Efficient Detection and Correction of Data Locality Problems using Selective Profiling.
In proceedings of the 15th USENIX Symposium on Operating Systems Design and Implementation (**OSDI**), USENIX Association, 2021.
Received the "Artifact Available" USENIX badge
First profiling technique that enables in-production profiling without any overhead, guides optimizations to make real-world workloads twice as faster, and has been adopted in the Arm Neoverse N1 Core

ISCA'21 **Tanvir Ahmed Khan**, Dexin Zhang[U], Akshitha Sriraman, Joseph Devietti, Gilles Pokam, Heiner Litz, and Baris Kasikci
Ripple: Profile-Guided Instruction Cache Replacement for Data Center Applications.
In proceedings of the 48th International Symposium on Computer Architecture (**ISCA**), IEEE, 2021.
First cache replacement technique that uses program context to make efficient code replacement decisions

FAST'21 Ian Neal, Gefei Zuo, Eric Shiple, **Tanvir Ahmed Khan**, Youngjin Kwon, Simon Peter, and Baris Kasikci
Rethinking File Mapping for Persistent Memory.
In proceedings of the 19th USENIX Conference on File and Storage Technologies (**FAST**), USENIX, 2021.
Optimizes the file offsets to persistent memory mapping operation, providing up to 45% performance gains

MICRO'20 **Tanvir Ahmed Khan**, Akshitha Sriraman, Joseph Devietti, Gilles Pokam, Heiner Litz, and Baris Kasikci
I-SPY: Context-Driven Conditional Instruction Prefetching with Coalescing.
In proceedings of the 53rd IEEE/ACM International Symposium on Microarchitecture (**MICRO**), IEEE, 2020.
Semiconductor Research Corporation (SRC) Best Paper, Q3'2020
First instruction prefetching technique that enables conditional prefetching only when program context leads to instruction cache misses; I-SPY achieves near-ideal cache performance and has been adopted by Intel

IISWC'20 Yuhan Chen[U], Jingyuan Zhu[U], **Tanvir Ahmed Khan**, and Baris Kasikci
CPU Microarchitectural Performance Characterization of Cloud Video Transcoding.
In proceedings of the IEEE International Symposium on Workload Characterization (**IISWC**), IEEE, 2020.
Finds key bottlenecks in instruction cache, data cache, and branch predictor for video transcoding workloads

PLDI'19 **Tanvir Ahmed Khan**, Yifan Zhao[U], Gilles Pokam, Barzan Mozafari, and Baris Kasikci
Huron: Hybrid False Detection and Repair.
In proceedings of the 40th ACM SIGPLAN Conference on Programming Language Design and Implementation (**PLDI**), ACM, 2019.
Received the "Artifacts Available" and "Artifacts Functional" ACM badges
Semiconductor Research Corporation (SRC) Best Paper, Q2'2019
A system that makes parallel programs up to 8× faster by automatically detecting and repairing false sharing

Peer-Reviewed Journal/Workshop Publications and Posters

Underlined authors are undergraduate[U] and graduate[G] students mentored by me.

OSR'22 Muhammed Ugur[U], Cheng Jiang[U], Alex Erf[U], **Tanvir Ahmed Khan**, and Baris Kasikci
One Profile Fits All: Profile-Guided Linux Kernel Optimizations for Data Center Applications.
ACM Special Interest Group on Operating Systems (SIGOPS) Operating Systems Review, ACM, 2022.

WoSC'22 Truls Asheim[G], **Tanvir Ahmed Khan**, Baris Kasikci, and Rakesh Kumar
Impact of Microarchitectural State Reuse on Serverless Functions.
In proceedings of the 8th International Workshop on Serverless Computing (WoSC), ACM, 2022.

Wireless Networks'19 **Tanvir Ahmed Khan** and A. B. M. Alim Al Islam
Enhancing Throughput in Multi-Radio Cognitive Radio Networks.
Wireless Networks, Springer, 2019.

MobiSys'16 **Tanvir Ahmed Khan** and A. B. M. Alim Al Islam
Poster: Overcoming Throughput Degradation in Multi-Radio Cognitive Radio Networks.
In proceedings of the 14th Annual International Conference on Mobile Systems, Applications, and Services (MobiSys) Companion, ACM, 2016.

WiMob'15 **Tanvir Ahmed Khan**, Chowdhury Sayeed Hyder, and A. B. M. Alim Al Islam
Towards Exploiting a Synergy between Cognitive and Multi-Radio Networking.
In proceedings of the 11th IEEE International Conference on Wireless and Mobile Computing, Networking and Communications (WiMob), IEEE, 2015.

Employment

2017-present **University of Michigan**, Ann Arbor, Michigan, USA
- Research Assistant, Electrical Engineering and Computer Science
- Advisor: Baris Kasikci

Summer 2021 **ARM**, Austin, Texas, USA
- Research Intern, Microarchitecture Research Group
- Mentor: Krishnendra Nathella and Dam Sunwoo

Summer 2020 **Facebook**, Menlo Park, California, USA
- Software Engineer Intern, Binary Optimization and Layout Tool (BOLT) Team
- Mentor: Maksim Panchenko

Summer 2019 **Microsoft**, Redmond, Washington, USA
- Research Intern, Azure Hardware Research Group
- Mentor: Gagan Gupta and Rathijit Sen

2014-2017 **Bangladesh University of Engineering and Technology**, Dhaka, Bangladesh
- Lecturer, Department of Computer Science and Engineering

Teaching

Winter 2022 **University of Michigan**, EECS 582
- **Primary Instructor** for the graduate course, Advanced Operating Systems

Spring 2022 **Carnegie Mellon University**, 18-847C
- Invited guest lecture on profile-guided compiler optimizations for Data Center Computing

Winter 2019 **University of Michigan**, EECS 570
- Teaching Assistant with Prof. Thomas Wenisch for the graduate course, Parallel Computer Architecture

2014-2017 **Bangladesh University of Engineering and Technology**, CSE 305, CSE 313, CSE 309
- **Primary Instructor** for the undergraduate course, Computer Architecture
- **Primary Instructor** for the undergraduate course, Operating Systems
- **Primary Instructor** for the undergraduate course, Compilers

Research Mentoring

2022-present Woojin Jung (Cranbrook High School)
Performance characterization and optimization of distributed gradient boosting workloads

2022-present Kan Zhu (UM BSc)
Architectural implications of Google's data center applications
First place in ACM undergraduate student research competition (MICRO'22)

2022-present Diane Chiang (UM BSc)
Visualization of thread interleavings among Google's data center applications

2022-present Fangjia Shen (Purdue PhD)
Performance characterization and acceleration of Apache Spark workloads

2022-present Yiwei Yang (UCSC PhD)
Emulating memory disaggregation for data center applications

2022-present Pooneh Safayenikoo (UCSC PhD)
Data-driven far memory allocation, prefetching, and replacement

2021-present Saba Jamilan (UCSC PhD)
Profile-guided timely software prefetching and replacement
First author of APT-GET [EuroSys'22]

2021-present Surim Oh (UCSC PhD)
Precise and timely wrong-path prefetching

2021-present Ali Ansari (EPFL PhD)
Architectural and systems-level implications of CloudSuite-4.0 applications

2021-present Shanqing Lin (EPFL PhD)
Systems-level architectural simulation of CloudSuite-4.0 applications

2021-present Truls Asheim (NTNU PhD)
Analyzing microarchitectural behaviour of serverless functions
First author of the WoSC'22 paper

2020-present Peter Braun (UCSC PhD)
Performance characterization and optimization of modern processor's frontend for data center applications
Co-author of PDede [MICRO'21]

2020-present Yuxuan Zhang (UPenn PhD)
Online profile-guided optimizations for C/C++ applications
First author of OCOLOS [MICRO'22]

2020-present Yuhan Chen (UM BSc → UM PhD)
Performance characterization and acceleration of irregular workloads
First author of the IISWC'20 paper
First author of the DATE'23 paper

2020-2022 Sara Mahdizadeh Shahri (UM PhD → CMU PhD)
Proxy-web: a proxy app suite for production web services
Co-author of Thermometer [ISCA'22]

2021-2022 Shixin Song (UM BSc → MIT PhD)
Profile-guided BTB replacement for data center applications
First author of Thermometer [ISCA'22]
First place in ACM undergraduate student research competition (MICRO'21)
CRA outstanding undergraduate researcher award honorable mention, 2022

2020-2022 Muhammed Ugur (UM BSc, MSc → Yale PhD)
Profile-guided Linux Kernel optimizations for data center applications
Co-author of Whisper [MICRO'22]
First author of One Profile Fits All [OSR'22]

2022 Zhenhang He (UM BSc → Pinterest)
Enabling microarchitectural simulations of data center applications

2021 Scott Hadley (UM BSc → ARM)
Enabling microarchitectural simulations of managed workloads

2019-2021 Nathan Brown (UM BSc, MSc → ARM)
Profile-guided instruction cache and BTB prefetching for data center applications
Co-author of Twig [MICRO'21]
First place in ACM undergraduate student research competition (CGO'20)

2020 Dexin Zhang (USTC BSc → USTC PhD)
Profile-guided instruction cache replacement for data center applications
Co-author of Ripple [ISCA'21]

2020 Ashfaqur Rahaman (BUET BSc → Utah PhD)
Load-time code layout optimizations

2020 Yineng Yan (UM BSc → UT Austin PhD)
Record and replay debugging for arbitrary GPU programs

2019 Shariq Hafeez (UM BSc → Citadel)
Optimizing data locality for stash databases

2019 Zhiqi Chen (UM BSc → CMU MSc)
Optimizing data locality for MySQL

2019 Xiaohe Cheng (HKUST BSc → Google)
Optimizing data locality for Memcached, Redis, SQLite, Graph500, and XStream

2018-2019 Yifan Zhao (UM BSc → UIUC PhD)
Hybrid false sharing detection and repair
Co-author of Huron [PLDI'19]

Grants and Gifts

2023 **Google gift, 300K USD**
Rethinking Micro-Architectural and Operating Systems Abstractions for Data Center Applications
Principal Investigators: Tanvir Ahmed Khan and Baris Kasikci

2022 **Intel TSA grant, 600K USD**
Data-Driven Processor Design for Datacenter Applications
Principal Investigators: Baris Kasikci, Daniel A. Jiménez, Heiner Litz, and Akshitha Sriraman

2021 **Semiconductor Research Corporation (SRC) realignment grant, 406K USD**
Proxy-Web: A Proxy App Suite for Production Web Services
Principal Investigators: Baris Kasikci, Timothy Rogers, and David Brooks

2020 **NSF/Intel Partnership on Foundational Microarchitecture Research (FoMR), 360K USD**
Taming the Instruction Bottleneck in Modern Datacenter Applications
Principal Investigators: Baris Kasikci and Joseph Devietti

2020 **Semiconductor Research Corporation (SRC) seed grant 150K USD**
Proxy-Web: A Proxy App Suite for Production Web Services
Principal Investigators: Baris Kasikci, Timothy Rogers, and David Brooks

Open-Source Software and Tools

September 2022 **OCOLOS**
The artifact implements the first online code layout optimization system (MICRO 2022) for applications written in C/C++ languages and allows profile-guided optimization to be performed on a running process. https://github.com/upenn-acg/Ocolos-MySQL

July 2022 **One Profile Fits All**
The artifact consists of software and source code of Linux Kernel's profile-guided optimizations (OSR 2022 and Linux Plumbers Conference 2021) and evaluation scripts for eight open-source data center applications (Apache, Nginx, Redis, Memcached, Leveldb, Rocksdb, MySQL, and PostgreSQL).
https://github.com/efeslab/lk-profile and https://github.com/facebookincubator/BOLT

June 2022 **Thermometer**
The artifact consists of Thermometer's (ISCA 2022) software and source code, evaluation, and instructions.
https://github.com/efeslab/thermometer-artifact

July 2021 **DMon**
The artifact contains the prototype of DMon (OSDI 2021) implementing selective profiling, a technique that locates data locality problems with low-enough overhead that is suitable for production use.
https://github.com/efeslab/dmon-ae

June 2021 **I-SPY** and **Ripple**
The artifact consists of software and source code of I-SPY (MICRO 2020) and Ripple (ISCA 2021), a VirtualBox image with pre-installed data center applications, and these applications' traces.
https://github.com/efeslab/ispy-ripple

February 2021 **NVM File Indexing**
The open-source file system is optimized for file mapping on persistent/non-volatile memory (FAST 2021).
https://github.com/efeslab/nvm-file-indexing

May 2019 **Huron**
The artifact consists of a VirtualBox image containing the Huron (PLDI 2019) software and source code, evaluation data, instructions, and all open source evaluation applications and input files.
https://github.com/efeslab/huron and https://doi.org/10.1145/3325966

Invited Talks

Whisper: Profile-Guided Branch Misprediction Elimination for Data Center Applications

December 2022 Apple Computer Architecture Reading Group
Host: Muawya Al-Otoom and Tyler Huberty

November 2022 AMD Tech Talk
Host: Jagadish Kotra

November 2022 ARM Austin CPU Group
Host: Dam Sunwoo

October 2022 IEEE/ACM International Symposium on Microarchitecture (MICRO)
Session chairs: Ulya Karpuzcu and Boris Grot

Rescuing Data Center Processors

December 2022 Columbia University
Host: Baishakhi Ray

October 2022 Intel Labs ArchFest
Host: Zeshan Chishti

January 2022 University of California, Riverside
Host: Zhiyun Qian

January 2022 University of California, Irvine
Host: Sangeetha Abdu Jyothi

November 2021 Applications Driving Architectures (ADA) Fall Symposium
Session chair: Ada Gavrilovska

November 2021 University of Michigan Graduate Honors Competition
Host: Emily Mower Provost

November 2021 University of California, Los Angeles
Host: Jens Palsberg

November 2021 University of California, San Diego
Host: Dean Tullsen

October 2021 University of Michigan Systems Lab
Host: Max S. New

October 2021 University of California, Santa Cruz
Hosts: Lindsey Kuper and Tyler Sorensen

October 2021 Texas A&M University
Host: Daniel A. Jiménez

September 2021 University of Rochester
Host: Sreepathi Pai

Thermometer: Profile-Guided BTB Replacement for Data Center Applications

June 2022 IEEE/ACM International Symposium on Computer Architecture (ISCA)
Session chair: Esha Choukse

Twig: Profile-Guided BTB Prefetching for Data Center Applications

May 2022 Applications Driving Architectures (ADA) Annual Symposium
Session chair: Zachary Tatlock

October 2021 IEEE/ACM International Symposium on Microarchitecture (MICRO)
Session chair: Pedro Trancoso

Locality Optimizations for Data Center Applications

September 2021 Semiconductor Research Corporation (SRC) TECHCON
Session chair: Lisa Green

July 2021 ARM Research
Host: Alex Rico

May 2021 Applications Driving Architectures (ADA) Annual Symposium
Session chair: Timothy G. Rogers

April 2021 EuroSys Doctoral Workshop
Session chair: Irene Zhang

December 2020 Students' Forum Speaker, International Conference on Networking, Systems and Security
Session chair: Mahmuda Naznin

DMon: Efficient Detection and Correction of Data Locality Problems Using Selective Profiling

July 2021 USENIX Symposium on Operating Systems Design and Implementation (OSDI)
Session chairs: Deniz Altinbüken and Rashmi Vinayak

Ripple: Profile-Guided Instruction Cache Replacement for Data Center Applications

June 2021 IEEE/ACM International Symposium on Computer Architecture (ISCA)
Session chair: Esha Choukse

I-SPY: Context-Driven Conditional Instruction Prefetching with Coalescing

October 2020 IEEE/ACM International Symposium on Microarchitecture (MICRO)
Session chair: Trevor E. Carlson

Huron: Hybrid False Sharing Detection and Repair

August 2019 Microsoft C++ Compiler Team
Host: Mo Di

June 2019 ACM SIGPLAN Conference on Programming Language Design and Implementation (PLDI)
Session chair: Veselin Raychev

May 2018 Intel Labs Wireless Networking Research Group
Host: Satish C. Jha

Selected Professional Services

2023 Program Committee Member for International Symposium on Code Generation and Optimization (CGO'23)

2022 External Review Committee Member for International Symposium on Microarchitecture (MICRO'22)

2022 Publicity Chair for Young Architect Workshop (YArch'22)

2022 External Review Committee Member for International Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS'22)

2021 Shadow Program Committee Member for European Conference on Computer Systems (EuroSys'21)

2021 External Review Committee Member for International Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS'21)

2020 Artifact Evaluation Committee Member for SIGPLAN Conference on Programming Language Design and Implementation (PLDI'20)

2020 Artifact Evaluation Committee Member for Third Conference on Machine Learning and Systems (MLSys'20)

2020 Artifact Evaluation Committee Member for International Conference on Architectural Support for Programming Languages and Operating Systems (ASPLOS'20)

2019 Artifact Evaluation Committee Member for ACM Symposium on Operating Systems Principles (SOSP'19)

2019 Student Volunteer for SIGPLAN Conference on Programming Language Design and Implementation (PLDI'19)

Outreach Activities

2022-present **High School Student Mentoring**

- Woojin Jung (Cranbrook High School)

2018-present **Mentoring Students from Underserved Groups**

- Diane Chiang (UM BSc)
- Yiwei Yang (UCSC PhD)
- Pooneh Safayenikoo (UCSC PhD)
- Saba Jamilan (UCSC PhD)
- Surim Oh (UCSC PhD)
- Yuxuan Zhang (UPenn PhD)
- Sara Mahdizadeh Shahri (UM PhD)
- Shixin Song (UM BSc)
- Ashfaqur Rahaman (BSc in Naval Engineering)
- Xiaohe Cheng (HKUST BSc)

2022 **Data Analytics for Detroit Digital Inclusion**

- Eliminating digital inequality in the greater Detroit area
- As a volunteer, advising and mentoring undergraduate and master's student research assistants

2021 **"My CS PhD" Information Session Panelist**

- Attending as a panelist in the info session for undergraduates about getting a PhD in computer science
