

Dear CSE community,

The Weimer research group is seeking participant for a research study.
You are receiving this email because we seek subjects with programming
experience and knowledge(equivalent to the completion of EECS280 and EECS281) .

If you participate in this study, you would have your brain
scanned using a fNIRS machine for around 60 minutes while performing software engineering
and mental rotation tasks. Participants must be adults 18 or older and able to complete a
programming assessment successfully. The entire study will take around 90 minutes including
gathering consent, setting up, training, and questionnaires.

You will be compensated \$50 for your time. You can stop anytime during the
scanning and still receive \$20.

If you are interested in participating or have any questions about the
study, please email Yu Huang <yhhy@umich.edu>.

Sincerely yours,
Yu Huang
