## Responses to Open-ended Questions

### What suggestions would you make for improving the course ? (Q955)

Comments
HW5 was a little too open ended which made it somewhat unclear what was expected.
I would have liked to have an assignment on lambda calculus.
I wish there were fewer greek letters. No, Impossible.

### Among the courses you have already taken, which proved the most (or least) effective in preparing you for this course, and why? (Q1098)

Comments
N/A
Coming from a electrical engineering background in undergraduate, the math background I had coupled with industry experience proved most effective.

### What were the strengths of the course ? (Q953)

Comments
Wes's engaging presentation of the material.
Instructor, structure of the course.
This course does not only cover subjects about Programming Language, but also covers daily lives and academic lives as graduate students.

### Comment on the quality of instruction in this class.

Comments
Extremely high quality instruction. Wes seemed to legitimately care about his students and their grasp of the material
Wes is one the best professors I have met in my life and one whom I really respect a lot. I did not feel any fear expressing myself in the classroom and participating in discussion, nor did I feel any hesitation in approaching Wes.
The quality is insurmountable. I can hardly think of any courses I have taken before have such high quality. Every lecture and discussion is so enjoyable and exciting.
