Kevin Angstadt

Please rate the performance of your TA on a scale of ONE-TO-FIVE with five (5) being "Excellent job" and one (1) being "Poor job:

Average: 4.941 out of 5

General comments about the TA:

- Kevin is very helpful.

- Very knowledgeable and helpful.

- Clear understanding of material. Explains concepts very well. Creates a good learning environment.

- Kevin is doing a great job. I gain much more from the lab than from the lecture sessions themselves.

- Kevin always has different activities for us to do during each lab hour. I feel that he is very fair in his grading, and that we know what is expected of us for our assignments.

- He helps me understand the course material that we covered in class. Sometimes I'm not always certain what we learn in class and so with Kevin, he really clarifies it.

- Was very creative when planning activities.

- Does a very good job explaining grammar topics and clarifying questions. Prepares me well for class exams.

- He is really good with explaining everything, whenever we don't understand anything he will slow everything down any explains it in an understandable manner. He is also very approachable.

- Kevin is literally the smartest person I've met on this campus. He explains everything in a way that the professor wants it to be taught, while also understanding the difficulty on the student's part in learning new material, especially since it is all in German. He also has facts about every word, grammar rule, German culture, history, etc. that make him seem like an encyclopedia. We were extremely lucky to have Kevin.

- Kevin is awesome. Honestly better than the professor.

- Kevin is the best TA ever! We wish he could stay for next year because he is, litterally, the best TA ever!

- He is an amazing person, knows a lot about german. He is very skilled.

- Very helpful and is a huge help to learning the language!

General comments about the Lab:

- Lab is really helpful.

- Very helpful in enforcing topics learned in class.

- Great lab. My time is well spent here. I get a deeper understanding of the concepts in lab.

- I wish the lab was on Tuesdays, Thursdays, so it would bein between the lecture session on MWF, rather than on MW when we have class.

- I think that lab would be more useful if it focused more on exercises about the content of each chapter in a rigid structure such as worksheets from the workbook or exercises from the textbook. This however is obviously a matter of personal preference.

- I really appreciate everything he teaches us in lab and I greatly enjoy it every week.

- Very entertaining lab.

- The lab does a good job expanding my knowledge of the subject matter.

- Very entertaining lab, we learned some really really useful things that if we hadn't known the overall class would have been much more difficult.

- Very useful that is on days in which we don't have class so that we don't have a double dose of German on Mondays and Wednesdays.

- Kevin always makes sure to ask everyone at the beginning of lab what we need to review. His array of activities helps us learn the topics in different ways.

- Fantastic learning environment

- I learn so much in lab! It's great! I probably learn as much in lab as I do in class!

- The lab is interesting and i cannot think of anything that could be done to improve it.

- I am a multi-language major, and this has been my best lab experience. Kevin is an amazing TA!

- Lab was fun and a lot of help.
