Subject: Midterm Student Feedback

This addendum is a complementary document to the Fall 2018 EECS 388 end-of-term feedback report. This document is a summary of student feedback that specifically mentions Kevin Fu's name and this addendum has only been provided to him. In particular, Kevin Fu was named in survey questions that focused on **pace** (question1), **participation** (question 2), **course climate** (questions 8-10) and **strengths of the course** (question 11).

Pacing (Question 1): Of the 32 comments that indicated that "pacing varies by instructor," Kevin Fu was directly mentioned in 31% of the comments. Here are some representative statements:

- *"Professor Fu explains material clearly and in a comfortable pace.""*
- *"A lot of the lectures seemed to go over things way too quickly and in not enough detail, where other lectures repeat things that have already been covered. Fu has lectured about things Honeyman already had."*
- *"Kevin Fu has generally fantastic pacing, but he steps out for most of the highly technical topics that would need to be paced properly."*

Participation (Question 2): Of the 41 comments that focused on student participation, Kevin Fu was directly mentioned in 15% of the comments. Here are some representative statements:

- *"Fu did a good job having student participation"*
- *"Prof Fu does a great job of engaging students and interacting with us."*

Course Climate (Questions 8-10): When naming Kevin Fu in comments about course climate, these students described him as "respectful" toward others and "welcoming." Here are some representative comments:

- *"Professor Fu was amazing. He was respectful, and his lectures were engaging."*
- *"Prof Fu is very welcoming and makes me feel like every question is a valid question, every answer is a valid attempt."*

Strengths of the Course (Question 11): Although <10% of student comments, Kevin Fu was directly named as a strength of the class. Here are some representative quotes:

- *"Professor Fu's energetic teaching manner made lecture enjoyable and personally made it easier for me to want to learn the material".*
- *"Professor Fu's lecture style really helped me learn when he took over. He explained things more clearly and concisely and with few tangents within the point he was making."*
