20. **What are the major strengths of this class? What is helping you to learn? (Q979)**
    - Hamilton answers questions very thoroughly and seems to both be very passionate about the material as well as understand it incredibly well.

21. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**
    - Hamilton assumes the base line of knowledge for students is higher than it is. I frequently struggled being able to follow certain lectures because she assumed I already knew some underlying principle relevant to the material. I would appreciate if she took a step back with some lectures and restated some of the more fundamental aspects of the material.

20. **What are the major strengths of this class? What is helping you to learn? (Q979)**
    - Office hours, especially with the increase in staff.
      The labs are usually very helpful for previewing the projects but are sometimes too long (especially on the weeks a project is due).
      IAs are very talented.

Availability of resources on course website.

21. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**
    - Nicole is a great teacher and it is evident has she is very knowledgeable on the topics. I would suggest, however, sometimes slowing down a little bit and trying to be more clear and neat when writing on the slides. I know this is minor, but sometimes it is hard to follow when they are messy/you can't read them and are trying to take notes. Also just keeping in mind that everyone is coming from a different background, so while some students have already seen and mastered the content, it is difficult and challenging for others. When I ask her to reexplain something, it is usually because it is the first time I am seeing it– not because she was unclear or I wasn't listening.

22. **Please enter any additional comments you have for Nicole Hamilton. (Q981)**
    - I wanted to thank the professors for hiring additional IAs.
    I also wanted to thank Professor Juett for having the anonymous question form and responding to them. The students really appreciate, respect, and admire this.

    - Need to expand the CS department. Perhaps even make it the University of Michigan School of Computer Science. CS is a

popular major, and this class just does not have the infrastructure to handle the amount of people taking it.

21. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**
    - Since not a lot of people don't go to my lecture anymore, and Professor Hamilton started randomly calling on people in

class to participate, I am now more likely to choose to skip the class and just watch the lecture recordings out of fear of being randomly chosen on in class. I would prefer if she didn't randomly call on students because not everyone learns best when they are scared of being called on for the whole class. Having this fear distracts me sometimes from the content being taught because I will be constantly prepping myself for being called on.

21. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**
    - I think she repeats content far too much. It's fine to review concepts, but sometimes she'll spend nearly half the lecture

going over the exact same content as the previous lecture. I think this time would be better spent going more in depth into new topics.

21. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**

- I think it would be nice to incorporate more exam–style prep into not just lab, but also lecture, because sometimes the exam prep in lab feels really rushed.
