20. **What are the major strengths of this class? What is helping you to learn? (Q979)**
    - Small coding exercises in the lecture notes and the lab assignments are really helpful. The directory of lecture notes is an incredible C++ resource.

21. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**

- [No Response]

22. **Please enter any additional comments you have for Nicole Hamilton. (Q981)**
    - The labs as a whole should be worth more. Maybe equal to a regular project or a little less. Their relatively low value makes them feel demoralizing when stuck on something.

20. **What are the major strengths of this class? What is helping you to learn? (Q979)**
    - This class has very few strengths. While lecture is somewhat informative, the projects and labs are seriously vague and are an incoherent blob. The pervading ambiguity hinders learning. Lecture often discusses contrived situations and professors often have a difficult time explaining how/why many examples posited during class have any real–world significance or use. Likewise, labs and projects force students to write implementations with (vague) guidelines that either

are poorly constructed (i.e. there are far better and more efficient ways that the code can be written if the said restrictions were not in place). Labs too do not teach applicable concepts and instead focus on contrived situations. Furthermore, almost all (with the exception of few) office hours IAs are clueless and do not offer any useful help/advice.

21. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**
    - —Discuss content that matters.
      —Disambiguate lab/project specifications.
      —Grant students greater freedoms in writing implementations.
      —Remove office hours IAs that are clearly incapable and hire competent ones.

20. **What are the major strengths of this class? What is helping you to learn? (Q979)**
    - So I don't go to lecture anymore because of one very disruptive student. But the class notes are phenomenal. They're the best, most descriptive set of notes I've read other than Paul's Online Math Notes. I've successfully managed to finish writing all the projects by myself with no difficulty, just by referring to them when I find a concept I don't know.

20. **What are the major strengths of this class? What is helping you to learn? (Q979)**
    - We look at lots of snippets of code in lecture, which helps me understand how the concepts will be applied when I am actually programming. Additionally, I enjoy the projects and how they actually demonstrate how CS can be applied in cool ways.

21. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**
    - I would move through the review material more quickly in lecture, so we can cover the new material more extensively.

22. **Please enter any additional comments you have for Nicole Hamilton. (Q981)**
    - I love how clear and welcoming Nicole Hamilton's teaching style is. Additionally, the music before class is great!
