16. **What were the strengths of the course ? (Q953)**
 - ◊ Fully fledged semester long project. Freedom of design.
17. **What suggestions would you make for improving the course ? (Q955)**
 - ◊ Tell future students not to take this class alongside EECS 482. By the end of the semester the combined workload becomes too much, and students will have to make choices on what to prioritize, and they will often pick 482 over this class because the projects are done in smaller groups, meaning each person carries more responsibility. In contrast, this class has groups of 6, so it's easier to not do anything and assume someone else will pick up the slack.

 - ◊ [No Response]
17. **What suggestions would you make for improving the course ? (Q955)**
 - ◊ This class is on a very limited time budget so hard choices have to be made about what's worth having students build themselves and what should be provided either in total or in part such as with homework starter code. In my opinion: having us recreate string and vector and almost any other standard library functionality we want is a total waste of time; conversely, we are given slightly too much hand holding on HTML parsing; bloom filter seems like something that could be optional; the rest are good homework assignments that help us just enough.
