9. **What are the major strengths of this class? What is helping you to learn? (Q979)**
   ◦ It teaches us to self–organize and seek help when we need it, just as we would as software engineers working in a company outside of college. There's a fine balance between collaboration and independence, and I think a large project like the one in this class is a great way to teach us students how to discover that balance.

10. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**
    ◦ Maybe you could provide some sort of milestone, like "you should ideally have your parser done by x date", just so we have an idea of how much time to dedicate to each part. I know you offer meetings for us to ask you on our own, but maybe it could be a part of the project guidelines as well.

   - Just the design of the class is unique and very interesting, and the collaboration with people is unique.

10. **How can Nicole Hamilton improve this class? If possible, give specific examples. (Q980)**
    - I honestly don't learn from lecture much. It's not her teaching, she's an excellent teacher, but I think it's how the lectures are. When I go up to Nicole, she answers everything perfectly, but the slides more so show everything at once and for me I'm a person that learns off of mistakes so lectures like James Juett's or 482 lectures like peter chen's that make the class very active in terms of concepts before showing you the solution instill more into me, in my opinion. Please don't take this the wrong way.

11. **Please enter any additional comments you have for Nicole Hamilton. (Q981)**
    - Very passionate instructor having difficulties to the sheer course size, but no complaints since I was only let in to this course from her mercy. Depending if I get an A on this class, I will hopefully be an IA and try to help her the next time this class is ran.
