

Dear CSE community,

The Weimer research group is seeking participants for a research study. You are receiving this email because we seek subjects with programming experience. If you participate in this study, you would have your brain scanned in a MRI for an hour while performing software engineering and prose writing tasks. Participants must be right-handed, native English speakers able to complete simple programming exercises. You must be eligible to receive an MRI scan. Example criteria include: aged 18-65, not pregnant, and not a former metalworker.

If you are interested in participating or have any questions about the study, please email Kevin Leach <kjleach@umich.edu>.

Sincerely yours,

Kevin Leach
